

Master of Science (MSc) in Shipping Operations and Management

Online Program

PROGRAM OVERVIEW

The Master of Science (MSc) in Shipping Operations and Management is unique, innovative, and global by design, world-class in quality and affordable in cost. The program is designed to cater to the needs of participants and employers through purely shipping-related courses.

Student and shipping professionals will be equipped with the knowledge, management skills and competencies required to pursue or enhance a successful career in shipping operations and maritime management including maritime logistics.

The objectives of the course include:

- Cultivate an in-depth understanding of shipping through interdisciplinary study
- Provide a global perspective on maritime industry operations and management
- Equip students with the expertise and professional outlook for a career in international shipping and maritime logistics

LANGUAGE OF INSTRUCTION: English

Program Learning Outcomes

- Maritime Economics: Demand/supply in trade, ship economics, and niche shipping markets
- Crew HR Practices: Leadership, team-building, retention, safety, and performance
- Ship Performance: Optimization models and data analytics for operational efficiency
- Chartering: Market practices, contract analysis in dry cargo/tanker sectors
- Maritime Law: Goods transportation, carriage contracts, and insurance principles
- Port Economics: Development, efficiency, governance, logistics, and supply chain integration
- Shipping Finance: Operations financing, risk management, and financial tools
- Safety & Environment: Management of safety and environmental protection with key performance indicators
