

Master of Science (MSc) in Green Transition & Sustainable Development

PROGRAM OVERVIEW

The **MSc in Green Transition and Sustainable Development (E-Learning)** is a postgraduate program designed to equip professionals with the knowledge, skills, and tools required to address global and regional sustainability challenges. The program provides a scientific and interdisciplinary approach to sustainability, combining principles of environmental science, green finance, circular economy, and policy-making with practical applications in real-world contexts.

The aim of the MSc in Green Transition and Sustainable Development (E-Learning) is to prepare high-caliber professionals to lead and implement green transitions within organizations and industries. By adopting a holistic approach to sustainability, students are encouraged to evaluate the environmental, economic, and social dimensions of decision-making. The program emphasizes ethical behaviour, corporate social responsibility, and the development of innovative solutions for global challenges such as climate change and resource depletion.

LANGUAGE OF INSTRUCTION: English or Greek
